

SCOUTVISION™ QRADAR INTEGRATION

Give Your SIEM Data Context

INTEGRATING SCOUTVISION™ WITH QRADAR

Integrating QRadar with the ScoutVision threat intelligence platform allows organizations to centralize and mobilize security operations in one place. ScoutVision highlights and provides context of known and unknown threats, increasing overall awareness of possible threats and their impacts on the organization. Remediation of an attack, however, doesn't stop there.

With ScoutVision comes access to LookingGlass threat intelligence data that covers a broad set of internet intelligence, providing a layer of protection unmatched in the industry that gives threat analysts the context to mitigate threats in a timely manner throughout the cyber threat lifecycle. ScoutVision's nearly 100 threat intelligence data feeds, in conjunction with QRadar integration, provide situational awareness and the best data for corrective course.

LookingGlass ScoutVision is a threat intelligence platform designed for security analysts hunting specific threats. With ScoutVision, analysts can deliver both strategic and tactical guidance to their stakeholders, as the platform delivers only the most relevant and timely information customized to the organization's environment.

The ScoutVision cyber threat map provides real-time representation of the Internet's infrastructure, connectivity, and asset ownership, combined with threat observations. The map immediately contextualizes data, enabling analysts to see how threats outside of an organization's networks relate to their own assets.

QRadar users incorporate the power of ScoutVision directly into their SIEM infrastructure leveraging the rules and processes that are part of their existing workflow, as well as receiving critical context to surrounding threats.

The screenshot displays the LookingGlass ScoutVision interface. At the top, there is a navigation bar with tabs for Dashboard, Offenses, Log Activity, Network Activity, Assets, Reports, Admin, and ScoutVision. The main header shows the LookingGlass logo and the IP address 14.18.145.82. Below this, there is a search bar and a filter dropdown set to 'Project'. The main content area is divided into two sections: 'INHERITED TAGS' and 'SYSTEM TAGS'. The 'INHERITED TAGS' section shows a table with 8 total tags, listing tag names and IP counts. The 'SYSTEM TAGS' section shows a table with filters for System Tags and Project Tags, listing tag names and dates.

Tag Name	IP Count
[L.G.GLIMR] TCP.Dcoy.Portscan	2
[L.G.GLIMR] ET.DROP.Dshield.Block.Listed.Source	2
[L.G.GLIMR] TCP.Portscan	1
[L.G.GLIMR] GPL.DNS.named.version.attempt	1
[L.G.GLIMR] ET.CINS.Active.Threat.Intelligence.Poor.Reputation	2
[L.G.GLIMR] ET.SCAN.SipCLI.VOIP.Scan	1

Name	Date Ad...
[L.G.GLIMR] ET.SCAN.Sipicious.Scan	2015-01-13
[L.G.GLIMR] GPL.DNS.named.version.attempt	2015-01-12
[L.G.GLIMR] TCP.Dcoy.Portscan	2015-01-14
[L.G.GLIMR] ET.DROP.Dshield.Block.Listed.Source	2015-01-10
[L.G.GLIMR] ET.CINS.Active.Threat.Intelligence.Poor.Reputation	2015-01-10
[L.G.GLIMR] ET.SCAN.Sipicious.User-Agent.Detected.(friendly.scanner)	2015-01-12

This LookingGlass integrated solution allows QRadar users to incorporate the power of ScoutVision directly into their SIEM infrastructure leveraging the rules and processes that are part of their existing workflow, as well as receiving critical context to surrounding threats.

FEATURES

BENEFITS

Integrated Threat Intelligence

- Allows for analysis of ScoutVision network elements directly inside SIEM
- Centralizes security operations within one system
- Threat intelligence correlation between actionable intelligence provided by LookingGlass and SIEM customer specific log and event data
- Increase in analyst productivity

High-Quality Data Feeds

- ScoutVision integration provides access to LookingGlass high-quality threat intelligence feeds that are continuously refined, updated, and vetted by expert security analysts and machine-learning algorithms

Plug and Play

- The ScoutVision platform is quick and easy to install and integrate out-of-the-box

ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and third party risks. Prioritized, relevant, and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
