

# SCOUTVISION™ INTEGRATION WITH SIEM

Make the Most of Your SIEM Data

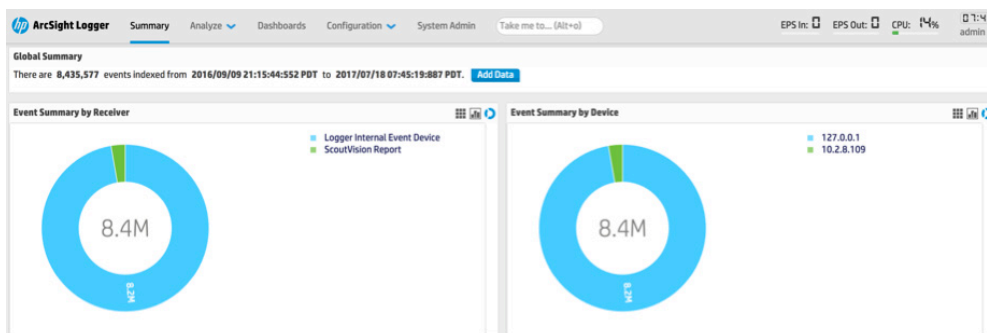

The LookingGlass ScoutVision threat intelligence platform, with its 100 threat intelligence feeds, integrates into your SIEM, increasing its effectiveness. ScoutVision is an advanced threat intelligence platform focused on identifying malicious threats and threat actors eyeing to harm your network.

ScoutVision's strength lies in its ability to footprint a network, and identify known organizational assets. By integrating your SIEM with LookingGlass' ScoutVision intelligence platform, the organization centralizes and

mobilizes security operations in one place, to highlight known and unknown threats, increasing your overall awareness of their possible impact to your organization. Remediation of an attack, however, doesn't stop there.

LookingGlass threat intelligence feeds provide a layer of protection unmatched in the industry that enable threat analysts to perform actionable steps in the efforts to mitigate threats in a timely manner throughout the cyber threat lifecycle.

ArcSight

QRadar

The screenshot shows the IBM QRadar Security Intelligence interface. It displays 'GENERAL INFORMATION' for an IP address. The IP address is 8.8.8.8. The ASN Owner is GOOGLE INC., the ASN Number is 15169, and the CIDR is 8.0.0.0/8. Below this, there is a table with columns for Threat ID and Criticality.

Threat ID	Criticality
[PLABS] C2a	90

The LookingGlass integrated solution allows SIEM users to incorporate the power of LookingGlass directly into their SIEM infrastructure leveraging the rules and processes that are part of their existing workflow.

**FEATURES**

**BENEFITS**

Integrated Threat Intelligence

- Allows for analysis of ScoutVision network elements directly inside SIEM
- Centralizes security operations within one system
- Threat intelligence correlation between actionable intelligence provided by LookingGlass and SIEM customer-specific log and event data
- Increases analyst productivity

High-Quality Data Feeds

- ScoutVision integration provides access to LookingGlass high-quality threat intelligence feeds that are continuously refined, updated, and vetted by expert security analysts and machine-learning algorithms

Data Visualizations and Metrics

- At-a-glance reporting capabilities

Plug and Play

- The ScoutVision platform integrates out-of-the-box leveraging Common Event Format (CEF)

## ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and third party risks. Prioritized, relevant, and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
