

SCOUTPRIME™

The Platform for More Intelligent Security Management

LookingGlass ScoutPrime is a threat intelligence platform that discovers, prioritizes, and orchestrates the mitigation of new and emerging cyber threats. By streamlining workflows and customizing how threat intelligence is viewed, your security teams will work faster – and smarter – to find and mitigate the threats that matter the most to your organization.

With ScoutPrime, organizations can leverage:

- **Out-of-the-box threat intelligence options**, as well as integration with third party data feeds.
- **LookingGlass Threat Indicator Confidence (TIC)** scoring to rank a threat's risk potential, allowing for quicker response and mitigation.
- **Flexible Workflows** to easily share threat data with other team members and contextualize the presentation of actionable threat intelligence.

A big challenge for security professionals is handling the sheer number of alerts they receive, which may or may not be legitimate. ScoutPrime customizes how threat intelligence is viewed, scored, prioritized, and acted upon, so your analysts can operationalize threat intelligence faster.

How Security Teams Can Use ScoutPrime Internet Intelligence:

- **Information Security Operations** – Security Operations Centers (SOC) can perform more granular monitoring on network elements and receive notifications of changes in risk to threat intelligence. This enables them to take appropriate actions in a more timely manner.
- **Third Party Risk Analysts** – Make risk-based decisions about vendors, partners, and your supply chain by monitoring third party network elements for changes in associated threat intelligence.

FLEXIBLE ANALYST WORKFLOW

THIRD PARTY RISK MONITORING

CUSTOMIZABLE THREAT INTEL SCORING

FEATURES

BENEFITS

Threat Indicator Confidence (TIC) Scoring	<ul style="list-style-type: none"> Find relevant intelligence faster and reduce “alert fatigue” by ranking threats based on factors such as an organization’s environment, threat landscape, and security posture TIC scoring is only available in ScoutPrime
Aggregated Threat Data	<ul style="list-style-type: none"> Access to the largest collection of threat intelligence data gleaned from a wide variety of sources, including LookingGlass proprietary intelligence and LookingGlass Machine-Readable Threat Intelligence
Powerful Collaboration Tools	<ul style="list-style-type: none"> Easily collaborate and share threat data and analysis with team members or other groups within your organization Workspace customization provides environments for repeatable analysis or investigation
Automatic Notifications	<ul style="list-style-type: none"> Learn about relevant incidents faster by receiving alert trigger notifications based on any expression used in the advanced search system
Graph Explorer	<ul style="list-style-type: none"> Faster visualization of relationships between network entities and threat intelligence Rapidly pivot to related elements based on ASNs, CIDRs, FQDNs, IPs, and observables
STIX & TAXII Support	<ul style="list-style-type: none"> Rapidly discover new and emerging cyber threats with industry threat intelligence sharing
Extensible API	<ul style="list-style-type: none"> RESTful API enables customers to integrate with other security analytics tools
Nested Collections	<ul style="list-style-type: none"> Granular analysis on the network
Inherited Threats	<ul style="list-style-type: none"> Understand threats from a higher level. Map threats back to the CIDR or network blocks that they are associated to

ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and 3rd party risks. Prioritized, relevant and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
