# CYBER ATTACK SURFACE ANALYSIS™

Actionable Intelligence on Third Party Vendors' Vulnerabilities

The Cyber Attack Surface Analysis is a deep-dive assessment of your vendors who may have access to your organization's networks and sensitive data. Your report will not only provide a historical analysis of potential compromise, but may also assist your organization to meet compliance and regulatory requirements. In addition, the Cyber Attack Surface Analysis can evaluate the cybersecurity hygiene of a company when conducting M&A activity. Provided with an aggregated risk summary, this report opens the door for a conversation with your vendor or upper management, outlining next steps for process changes enabling your organization to quickly address identified risks.

The Cyber Attack Surface Analysis extends beyond the listing of vulnerabilities and network issues Our security experts deliver a detailed analysis of threats and possible data breaches plaguing your organizations, as well as the actionable intelligence to address cyber threats.

### **System Compromise:**

Identifies evidence of live or recent infections on your network from botnets, viruses and malware

#### **Online Indications and Warnings:**

Examines feeds, posts and online chatter from more than 6,000 known actors and groups, as well as hacker channels and the Dark Web

# Domain Portfolio and Spear Phishing Risk:

Analyzes registered domain names for fakes and look-alikes to identify likely vectors for spear phishing

## Compromised User Accounts:

Identifies account credentials among billions of breached records

## Configuration and Vulnerabilities:

Maps your public facing Internet footprint and itemizes the type, number and severity of vulnerabilities available to a outside threat actor

# Leverage Cyber Attack Surface Analysis

- · Identify security vulnerabilities and receive actionable analysis to secure your attack surface.
- Save valuable analyst hours evaluating your security posture.
- · Gain insight into your vendors' application vulnerabilities to inform more effective management.
- · Proactively look for potential leaks, theft of sensitive data, or other holes in your vendor's security posture.

# BENEFITS TO YOUR ORGANIZATION

# **Expert Advice**

This isn't a pushbutton scorecard based on automated scans. LookingGlass provides full human vetting/analyst review of every finding to ensure that the false positives and "noise" common to many automated scorecard services are eliminated.

# **Industry's Most Comprehensive Intelligence**

We source from 87+ types of structured threat data feeds – including LookingGlass proprietary feeds – as well as coverage of unstructured content from the surfacesurface and Deep and Dark Web to provide a single, unified view of your cyber risk footprint. You can quantifiably assess and measure your internal security posture as threats and information assets continually evolve.

# ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and third party risks. Prioritized, relevant, and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
