

LOOKINGGLASS

# COMPROMISED CREDENTIAL INFORMATION

Protect Your Human Assets with Intelligent Data Monitoring

## LookingGlass CCI Monitoring and Look-up Services

- Compromised Account Credentials:** Enterprises can determine if their employee email addresses and/or user account logins have been compromised. LookingGlass is capable of monitoring against full email addresses with a growing database of over 5 billion credentials to protect against compromised accounts.
- Compromised Social Security Numbers:** Hijacking an identity is made easier with the illegal acquisition of Social Security Numbers. Protect your employees or customers against identity theft with our service that monitors hashed SSNs against daily dumps across various layers of the Internet.
- Compromised Credit Card Numbers:** The dreaded phone call from the bank fraud department is the last thing anyone wants. Credit card numbers are frequently traded and sold on the Internet, including the Deep and Dark Web, which is precisely where LookingGlass actively monitors. Keep fraud at bay with our Compromised Credit Card data feeds.

LookingGlass™ Compromised Credential Information (CCI) provides monitoring and look-up of leaked Personally Identifiable Information (PII), including the latest compromised account credentials, credit card numbers, and Social Security Numbers. This information is delivered from multiple layers of the Internet (surface and Deep and Dark Web) to comprehensively protect against identity theft and fraud. LookingGlass takes extra steps to provide broad, deep, clean, and relevant threat intelligence to protect your most valuable contributor, the human asset.

With LookingGlass CCI, your analysts can cut through the noise with 99.9% historical accuracy via a robust PII record database, helping narrow down relevant security items, ensuring that analysts are prioritizing their time and energy on the most important security events.

## Why Choose LookingGlass Compromised Credential Information?

### Multi-Layered Threat Coverage

Monitoring the various layers of the Internet poses complex challenges; however, LookingGlass CCI information is gathered from the various layers of the Internet that have been properly crawled, indexed, and analyzed. Only with the right team of experts and advanced tools can you action specific threats to protect your business.

### Secure Consumption Model

Easily monitor and control PII. Consumption capabilities include:

- Secure file transfer of PII
- Public key encryption
- Sensitive data is hashed and is never passed in plain text

### Ease of Integration

With documentation, downloadable code samples, and 24x7 customer support, CCI feeds can be easily ingested and consumed, often in a matter of hours.

- Helper libraries to speed the integration process (e.g., SDKs, bundled scripts, etc.)
