

THREAT INTELLIGENCE-AS-A-SERVICE™

AUGMENT YOUR CYBERSECURITY POSTURE WITH A LOW-COST, MANAGED SERVICE

MANAGED SERVICE

Information Security-as-a-Service™

Protect your organization’s network and sensitive data. LookingGlass™ analysts monitor and identify information security threats such as *phishing*, *malware*, and *ransomware*.

Brand Security-as-a-Service™

Protect your organization’s *brand*, *trademarks/logos*, *intellectual property*, and *online reputation*.

Physical Security Monitoring-as-a-Service™

LookingGlass analysts monitor for risks to your organization’s most valuable physical assets such as *impostor social media accounts*, *unauthorized domain names*, and *threats against employees, executives, and facilities*.

WHAT IS LOOKINGGLASS™ THREAT INTELLIGENCE-AS-A-SERVICE?

Protect your organization’s attack surface with one of the LookingGlass “as-a-Service” offerings: **Information Security**, **Brand Security**, or **Physical Security Monitoring**. Leverage the millions that LookingGlass has invested in our infrastructure, systems, and applications.

WHY?

Protecting your organization is a complex and costly endeavor. As the market matures, organizations are recognizing the value of a hybrid model for addressing their biggest cybersecurity concerns - whether from data breaches, brand abuse, or physical threats.

LookingGlass has three distinct “as-a-Service” packages. Each delivers monitoring of the Internet – surface, social, Deep and Dark Web – for real-time indicators of threats.

LookingGlass’ managed services give you access to a robust and scalable security operation, fully-trained cybersecurity professionals, and the necessary collection, analysis, and response systems and technologies to protect your business, employees, and customers.

ADDITIONAL FEATURES

- Granular incidents delivered via portal and API
- Monthly summary
- On-Demand Investigation & Analysis™ Analyst **(additional cost)**
- Response and Mitigation Services **(additional cost)**

The “as-a-Service” market is estimated to be worth more than eight billion by 2020.¹ What’s causing the rise in popularity? Companies trying to stay ahead of cyber threats before they become a business liability, all while balancing overworked and understaffed teams.

WHY GO “AS-A-SERVICE”?

One Stop Shop

Save yourself the hassle and frustration of coordinating with different companies for collection, analysis, and mitigation. Instead, streamline the process and fight your threats from start to finish with the same team, so you can rest assured that all of your issues are handled swiftly and with the same skill and importance.

Minimize Costs

Skip the costly steps of hiring more staff or building/replacing infrastructure. Buying vs. building means lower initial costs.

Quick & Easy Deployment

Why labor for years over building an expensive security program when you can have it all in a matter of days? Going “as-a-Service” simplifies deployment, delivering what you need faster than doing it yourself.

Trained Cyber Experts

By 2019 there will be nearly two million unfilled cybersecurity positions.² Fill the gaps in your headcount by partnering with an organization that gives you access to fully-trained, industry experts so your staff can use their valuable time to focus on your most important security demands.

ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass delivers unified threat protection against sophisticated cyber attacks for global enterprises and government agencies. Its comprehensive portfolio of managed services, threat platforms, machine-readable feeds, and automated threat response products – all supported by a global team of intelligence analysts – provides unprecedented visibility, response, and management of digital business risks. Prioritized, timely, and relevant cyber threat intelligence insights

enable customers to take action across the different stages of the attack life cycle. Organizations of any size and level of security operations maturity leverage our 20+ years of tradecraft and investment in scalable, innovative solutions to protect their most valuable assets – brand, employees, customers, networks, and facilities.
