

AUTOMATED DATA SERVICES™

High-Quality Data For Your Security Operation

Fueling your security operations with the highest-grade intelligence is essential to having a strong security posture. At LookingGlass™, we believe that the highest quality data is essential to navigate your security terrain. Our intelligent Automated Data Services (ADS) deliver **clean, deep, and broad** fuel that is **relevant** to your industry.

Clean - Reduce the noise your analysts face

Not all data is created equal, so collecting data for the sake of having it, is counterproductive. Our intelligent algorithms qualify the data, lowering false positives to near zero, making the data more valuable to you. You can be confident that LookingGlass intelligence being delivered to your analysts isn't wasting their time.

Depth & Breadth - Insight a mile wide and a mile deep

Reaching the depths of the Internet is a complex problem requiring security experts and advanced tools - integrated to bridge the gap between data and intelligence. LookingGlass provides insight across the entire Internet terrain (surface, social, and Deep and Dark Web).

Relevant - Make It About You

Data is exponentially more valuable when it is relevant to your organization. ADS provides company information specific to industries, geography, or organizations, etc. thus increasing the productivity of your business.

Technical Threat Indicator (TTI) Feeds

- Infection Records (global & country specific)
- Malicious C2 Domains
- Phishing URLs
- Malicious URLs
- Newly Registered Domains

Compromise Credential Information (CCI) Monitoring and Look-up Services

- Compromised Account Credentials
- Compromised Social Security Numbers
- Compromised Credit Card Numbers

Strategic Intelligence (SI) Report Types

- Policy & Regulation
- Special Events Analysis
- Industry Threats & Risk
- Threat Actor Landscape
- Data Breach Alerts
- Risk & Threat Analysis
- Cyber News Alerts
- Daily Threat News

These high-quality, intelligent threat data feeds are delivered in real-time to protect against dynamic threats and static attack vectors, which can be used to launch a directed attack against your organization. LookingGlass TTI feeds are machine-readable, have a 99.9% historical accuracy rate, with over 5 billion infection records, millions of malicious URLs, and the broadest coverage of global Advanced Persistent Threats in the industry.

The CCI monitoring and look-up service protects your organization and your customers by gathering Personally Identifiable Information (PII), including compromised account credentials, credit card numbers, and Social Security Numbers from all corners of the Internet, including the Deep and Dark Web.

With the LookingGlass Strategic Intelligence Subscription Service (STRATISS™), your organization has unlimited access to finished intelligence housed in our digital library. A STRATISS subscription provides access to security and intelligence analysts who author our finished intelligence reports. These analysts are available to answer questions about any STRATISS report. Leverage LookingGlass strategic intelligence to enhance your security posture with finished intelligence written by LookingGlass security experts.

ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and third party risks. Prioritized, relevant, and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
