

COMPROMISED CREDENTIAL INFORMATION™

MONITORING AND LOOK-UP OF LEAKED PERSONALLY IDENTIFIABLE INFORMATION (PII)

LookingGlass™ Compromised Credential Information (CCI) provides monitoring and look-up of leaked Personally Identifiable Information (PII), including the latest compromised account credentials, credit card numbers, and Social Security Numbers (SSNs). This information is delivered from multiple layers of the Internet (surface and Deep and Dark Web) to comprehensively protect against identity theft and fraud. LookingGlass takes extra steps to provide broad, deep, clean, and relevant threat intelligence to protect your most valuable intellectual property and customer and employee sensitive data.

LookingGlass CCI's historical accuracy and robust PII database helps analysts cut through the noise, narrowing down relevant security items and prioritizing analyst time and energy on the most important security events.

LOOKINGGLASS CCI MONITORING AND LOOK-UP SERVICES

- Compromised Account Credentials:**
 Enterprises can determine if their employee email addresses and/or user account logins have been compromised. LookingGlass is capable of monitoring against full email addresses with a growing database of over 5 billion credentials to protect against compromised accounts.
- Compromised SSNs:** Hijacking an identity is made easier with the illegal acquisition of SSNs. Protect your employees or customers against identity theft with our service that monitors hashed SSNs against daily dumps across various layers of the Internet.
- Compromised Credit Card Numbers:**
 The dreaded phone call from the bank fraud department is the last thing anyone wants. Credit card numbers are frequently traded and sold on the Internet, including the Deep and Dark Web. Keep fraud at bay with our Compromised Credit Card data feeds.

CHOOSE COMPROMISED CREDENTIAL INFORMATION

Multi-layered Threat Coverage

Monitoring the various layers of the Internet poses complex challenges; however, LookingGlass properly crawls, indexes, and analyzes the various layers of the Internet gathering CCI information. Only with the right team of experts and advanced tools can you action specific threats to protect your business.

Flexible Consumption Model

Easily monitor and control PII. Consumption capabilities include:

- Secure file transfer of PII
- Public key encryption
- Data is hashed and is never passed in plain text

Ease of Integration

With documentation, downloadable code samples, and 24/7/365 customer support, CCI feeds can be easily ingested and consumed, often in a matter of hours.

- Helper libraries to speed the integration process (e.g., SDKs, bundled scripts, etc.)

ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass delivers unified threat protection against sophisticated cyber attacks for global enterprises and government agencies. Its comprehensive portfolio of managed services, threat platforms, machine-readable feeds, and automated threat response products – all supported by a global team of intelligence analysts – provides unprecedented visibility, response, and management of digital business risks. Prioritized, timely, and relevant cyber threat intelligence insights enable

customers to take action across the different stages of the attack life cycle. Organizations of any size and level of security operations maturity leverage our 20+ years of tradecraft and investment in scalable, innovative solutions to protect their most valuable assets – brand, employees, customers, networks, and facilities.
